

ASKIA

The **AI chatbot** for optimizing your work processes.
Secure, fast, data-sovereign — **made in Switzerland.**

Asking instead of searching — finding answers to internal procedures often takes a lot of time. ASKIA supports you and your employees by being familiar with your organizational processes and delivering the needed answers in seconds. Whether questions about responsibilities, regulations, or instructions — ASKIA helps reliably. This leaves more valuable time for your company's projects and visions.

ASKIA was developed by Corporate Software — a member of SPIE Switzerland — specifically for the requirements and needs of Swiss companies. Our AI chatbot is based on the powerful GPT-4o language model, combined with Azure architecture, a framework technology for the secure management of cloud services and data.

When working with this AI chatbot, **the highest Swiss security standards** for your data are ensured.

Your data sovereignty comes first:

- Data hosting in the Swiss Azure data center
- No data access by Microsoft or other tech companies
- Exclusive access control via Entra ID
- Personally uploaded documents and chat histories are protected and not visible to others

An intelligent assistant two different modes one affordable price

ASKIA not only answers organizational questions, it is also a multilingual and creative all-rounder: finding the best wording for business emails, researching important facts, and summarizing offers. What regularly takes up valuable time in everyday work becomes a routine side task with our AI chatbot.

**Global-GPT:**

For support with general tasks and daily routines.

Enterprise-GPT:

For questions about internal processes and organization.

The important difference from conventional AI chatbots:

When you work with ASKIA, you don't have to fear that sensitive business secrets will end up with unknown third parties or even competitors.

CHF 2.40

in a monthly subscription per
Microsoft 365 license.

one-time

CHF 9,840

for integration into your infrastructure
and individual configuration.

An annual subscription for CHF 13,200
already pays off if you want ASKIA for
460 employees and Microsoft 365
licenses.
