Press release

SPIE becomes the exclusive distributor of DMS – Displays & Mobility Solutions in Switzerland

- Through this partnership, SPIE is expanding its service portfolio in the field of intelligent transport infrastructure.
- The dynamic traffic management and information systems developed by DMS – Displays & Mobility Solutions help ensure safe and efficient traffic flows.
- SPIE will be responsible for the planning, integration and commissioning of the systems, as well as the operation, maintenance and 24/7 support.

Bern, 25 June 2026 – SPIE, the independent European leader in multi-technical services in the areas of energy and communications, has become the exclusive distribution partner for the mobility solutions developed by DMS – Displays & Mobility Solutions. By adding dynamic traffic management and traveller information systems to its offer, the multi-technical service provider is expanding its portfolio of mobility solutions in Switzerland. These notably include variable message signs (VMS) and digital displays

providing road users with real-time information on traffic conditions, routes and network operations. The solutions are used across road networks and public transport systems, as well as in tunnels and smart parking applications.

DMS, a subsidiary of SPIE Dürr Austria with a production facility in Portugal, develops intelligent traffic management systems. As the exclusive distribution partner, SPIE Multi-Technical Services (MTS), a division of SPIE Switzerland, will bring these solutions to the Swiss market, adapt them to local requirements and integrate them into existing transport infrastructure. SPIE MTS will also ensure the reliable operation of the systems and provide preventive maintenance and 24/7 support.

“This exclusive partnership with DMS represents an important addition to SPIE’s transport infrastructure offering in Switzerland. We are confident that these solutions will enable us to provide our clients with the best possible support in meeting the growing demands placed on mobility systems,” said Edgar Lehrmann, interim CEO and CFO of SPIE Switzerland.

SPIE MTS specialises in multi-technical solutions and has expertise in smart cities and industry, smart buildings, building automation and solar photovoltaic leasing.

About SPIE Germany Switzerland Austria

SPIE Germany Switzerland Austria is a subsidiary of the SPIE Group. With over 20,000 technology enthusiasts at 750 sites, the company is a leading multi-technical service provider for buildings, systems and infrastructures in Germany, Switzerland and Austria.
