

CLOUD OR LOCAL IS NOT A CHOICE SECURE YOUR CORPORATE SUCCESS

Ensure the continued success of your business conforming to regulations and compliance. SPIE cello:backup 365 service allows you to easily and efficiently back up all your data. You will then benefit from security, flexibility and clear costs.

DATA IS THE KEY TO CORPORATE SUCCESS

Your data's security guarantees the success of your company - whether it is to avoid operational failures, to stay ahead of the competition or simply to successfully meet requirements

SPIE PROTECTS YOUR DATA

SPIE protects all your Microsoft 365 data and stores it securely in the Microsoft Cloud or alternatively on site at your premises according to your availability and operational requirements.

- Whether it's accidental deletion, internal or external compromise, or unclear policies, your data is backed up correctly and restored according to your requirements.
- Data is stored using AES-256 encryption to protect against misuse
- SPIE gives you control of your Microsoft 365 mailboxes, share point data and OneDrive / MS-Teams files with the backup service

- Fast recovery of data affected by malware or crypto-lockers
- Data storage in Microsoft Azure Datacenter in Switzerland or on-premise
- Your Service Level Agreements are guaranteed by SPIE Service Operations and reported accordingly

As a managed service, SPIE cello:backup 365 combines all the advantages of the technologies used with maximum operational reliability.

YOUR SECURITY

SPIE gives you the security you need to successfully assert yourself in an increasingly competitive market and to know how to develop further.

YOURS ADVANTAGES

- Data management in Switzerland

Stay financially agile

- Reduction of operating costs
- IT costs clearly calculable
- No capital commitment

ADVANTAGES OF SPIE CELLO:BACKUP 365

cello:backup 365 is a scalable solution for data backup and recovery and offers permanent security, availability and compliance. Modern backup methods (e.g. cloud to cloud) also ensure the reduction of your total cost of ownership (TCO) as part of the operational competence.

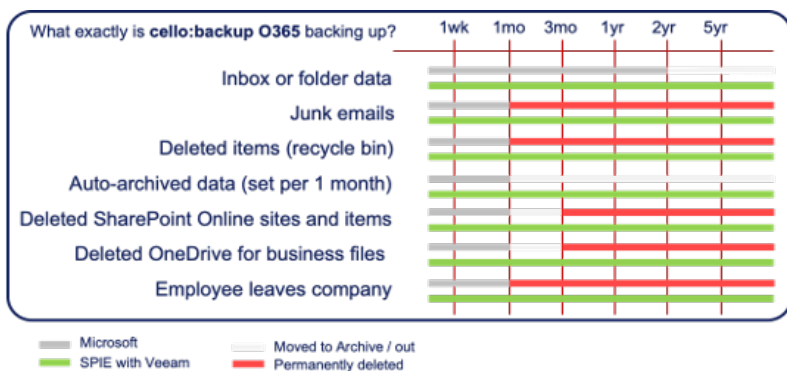

CELLO:BACKUP 365 AND IMPACT ON YOUR BUSINESS

The following business priorities can be successfully addressed:

- Data control through Managed Service and Service Agreements
- Avoidance of gaps in compliance with data retention requirements
- Reduction of the risk of attack through data security
- Compliance with all regulatory requirements for data protection
- Prevent bandwidth problems and meet agreed data recovery times

HOW LONG DOES CELLO:BACKUP 365 STORE YOUR DATA ?

The duration of data storage depends on your company priorities, governmental regulations (Data Retention and Data Protection Act) and has a lasting effect on the choice of backup methods, the dimensioning of the data storage and the scope of the backup service.

MARKET-LEADING TECHNOLOGIES

For the cello:backup 365, SPIE is working with the industry-recognized leaders Veeam (data backup technology) and Microsoft (public cloud service technologies). SPIE has a long history of partnership with these two technology companies.

OPTIONS

- SPIE stores the data exclusively in Switzerland upon request
- SPIE can distribute replicas worldwide on request to increase security or availability
- SPIE also stores backup on-premises if desired and agreed

SPIE ICS LEAD
