

The "Human Factor" represents one of the highest risk categories when it comes to IT security. The majority of security breaches are due to human error. Thankfully this risk can be effectively reduced by comprehensive security awareness training and employee support.

SPIE offers a holistic and adaptive Security Awareness and Acceptance Program, built on a state of the art multi-channel education and testing platform.

We offer phishing simulation, e-learning including video and extensive reporting. Our approach is anchored in the

"Strong IT security is achievable when the human factor is accounted for by appropriate training and support."

David Mantock
CISO at SPIE Switzerland

culture of your enterprise enabling your employees to engage and adapt to deliver business outcomes in a secure way.

Key metrics and features in a brief:

- Faster Incident Response
- C-Level Visibility
- Reduced Risk
- Higher Employee Engagement

STEP 1

USER EVALUATION & RISK ASSESSMENT

A simple questionnaire to produce a GAP analysis.

STEP 2

TRAIN THE USERS

The initial training commences already tailored to the level of know-how.

STEP 3

PHISH THE USERS REGULARLY

Start phishing (multiple scenarios).

STEP 4

REPORT AND RETRAIN

Repeat according to reporting insights and user feedback.

ABOUT SPIE ICS

Our values (performance, proximity and responsibility) and our extensive portfolio of solutions and established processes make us the ideal partner for small, medium-sized and large companies.

We are one of the few providers in Switzerland that can offer you first-class global and local geographical coverage.

Phase 1 – Core Awareness

Phase 2 - Intermediate

Phase 3 - Advanced

CYBER INTELLIGENT WORK-FORCE

We provide a tailor made service, based on proven use cases and state of the art learning theory and behavioral analysis. We weaponize your work-force not only to be cyber resilient, but also to be great

incident responders and an excellent source of local threat intelligence. SPIE equips you to enable and empower your enterprise to meet the challenges of the digital landscape of today and tomorrow.

Short-term

- E-Learning program on Security Awareness for the employees available in German, French and English.
- Inspire the employees with funny and interesting approaches.
- Help them to have a good security awareness, even while being at home.
- Strengthen defenses against targeted attacks and business E-Mail compromise.

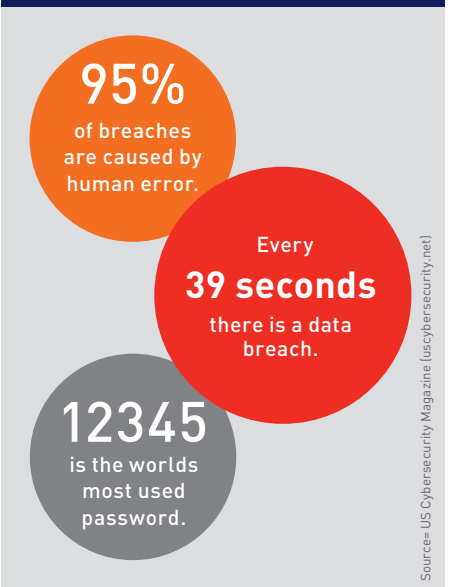

Medium-term

- Based on the results of the first phase enhance documentation, and complement with one pagers.
- Initiate additional scenarios to further improve and reinforce the awareness programm.

Long-term

- Aim at a more holistic integrated approach covering the operational and governance aspects of information security.
- Generate metrics based not only on e-learning, but also from other sources such as security incidents.
- Complement e-learning by using other channels to reach end users and ensure high employee participation and awareness.
