

CYBER RISK ASSESSMENT
REVIEW YOUR GLOBAL SECURITY
FOCUS YOUR ACTIONS
LOWER THE CYBER RISK

Data is at the center of today’s digital environment and is an integral part of how we do business. Every organization must protect its data and be able to recover quickly from attacks as cybercrime is constantly increasing and will continue to grow and evolve.

We offer a high-level Cyber Risk Assessment service, delivered using industry-standard frameworks such as NIST Cybersecurity and the Swiss National Cyber Security Center recommendations. This service enables you to identify, and evaluate your exposure to cyber attacks and will provide you with actionable recommendations.

Our approach is based around the three pillars that are “People, Process, Technology” and looks at your security from a global point of view. Our goal is to ensure each pillar is considered for better efficiency and thus lower the risk of a cyber-attack.

SECURITY CHECK & ASSESSMENT

A SPIE ICS security consultant will assess your environment to determine your current state of security. Our certified specialists use trusted methodologies

and automated tools to analyze the confidentiality, integrity and availability of your data and business platforms.

SCOPE

- Internal and external networks
- ICT systems including servers, clients, storage, backup and recovery
- Applications and interfaces
- On premise, cloud and hybrid scenarios
- Remote access

The results are presented in a clear and objective report. Countermeasures are also highlighted so that you have all directives needed to ensure the required level of protection. If further support and advice is required our specialists remain your disposal.

ABOUT SPIE ICS

Our values (performance, proximity and responsibility) and our extensive portfolio of solutions and established processes make us the ideal partner for small, medium-sized and large companies.

We are one of the few providers in Switzerland that can offer you first-class global and local geographical coverage.

Our services are based on industry best practices, current certifications and modern process-oriented methodology.
