

SECURITY AWARENESS
EVALUATE HUMAN RISK,
ENABLE THE WORKFORCE,
EMPOWER YOUR BUSINESS.

Security Awareness is the first line of defense against cyber threats and can make the difference between security and a catastrophic loss of data and trust. Dealing with cyber security goes beyond mere technical knowledge and requires a deep understanding of human behaviour, as many cyber attacks are based on manipulation and deception.

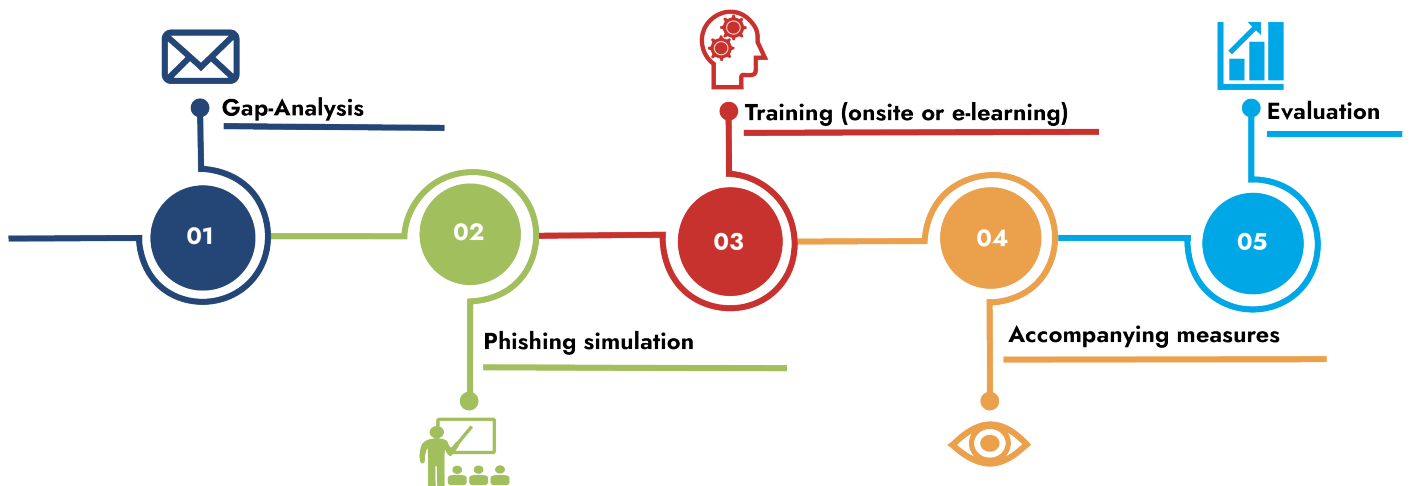

BENEFITS

SPIE approach is the combination of high-level cybersecurity expertise with proven principles of neuropsychology and behavioural psychology. Our services are designed to change both the awareness and the behaviour of your employees, making them a valuable addition to your existing IT security measures.

ABOUT SPIE ICS

Our values (performance, proximity and responsibility) and our extensive portfolio of solutions and established processes make us the ideal partner for small, medium-sized and large companies.

We are one of the few providers in Switzerland that can offer you first-class global and local geographical coverage.

EVALUATE

Raising **security awareness** through increasingly sophisticated phishing campaigns

ENABLE

Perfecting the phishing campaign with **e-learning modules on cybersecurity**

EMPOWER

Comprehensive, **customized approach** for analyzing user security awareness and measuring progress

On-site training session, available as an option, to foster the acceptance of the security awareness programm.

MAIN STEPS

- Deliver E-Learning and live teaching program on Security Awareness for the employees available in German, French and English.
- Launch phishing campaigns.
- Inspire the employees with fun and varied approaches.
- Foster a good security awareness, even in private life.
- Strengthen defenses against targeted attacks and business E-Mail compromise.

Effective behaviour change only succeeds if we address people emotionally.

Stéphanie Lanne
Solution Engineer Cyber Security
